I am a software engineer at Capgemini and helps to a company to build the software products. Specifically, I have worked in Prime Brokerage, Capital Market, Equity Syndication and Reporting streams of Investment Banking. I have a good experience in Java technology. I am a good follower for the best practices to maintain a code quality, perform refactoring and applying software design principles for the various aspects of programming in daily activities. Data Structures, Algorithms and Problem-Solving Methodologies are my areas of interest.
